[READ] Building LDAP-Enabled Applications with Microsoft's Active Directory and Novell's NDS by by Bruce Greenblatt

Building LDAP-Enabled Applications with Microsoft's Active Directory and Novell Directory Service shows how to build LDAP-savvy applications in Active Directory and NDS. LDAP is an open, vendor-neutral standard for accessing directory information. The book uses real-world code examples to demonstrate how to access LDAP-enabled applications using Java servlets, Java applets, and Active Server Pages, and covers security issues.
